

PROFESSIONAL CALF SUPPLEMENT SYSTEM

ELECTROLYTES PLUS™

CONCENTRATED NUTRITIONAL CALF SUPPLEMENT

- Concentrated energy and electrolyte supplement
- Source of live microorganisms
- For dairy or beef calves from two days of age through weaning

Sav-A-Caf® Professional Electrolytes Plus™ is a fortified high-energy and electrolyte supplement for treating dehydrated or stressed animals. The safe, effective formula is enriched with beneficial direct-fed microbials to help maintain normal gut microflora during bouts of scours. Contains glycine and kaolin, as well as sodium bicarbonate to help correct metabolic acidosis. Feed to nursing animals in between normal milk replacer feedings to combat dehydration from scours. Offer free choice to adult animals during periods of hot weather or other stresses.

MIXING INSTRUCTIONS

Mix 6 ounces (170 grams) of Sav-A-Caf® Professional Electrolytes Plus™ powder into 2 quarts (1.89 liters) of warm water. Stir to dissolve completely.

FEEDING INSTRUCTIONS

Feed mixed Sav-A-Caf® Professional Electrolytes Plus™ from an open pail, nipple pail, or nursing bottle. If using a nursing bottle, shake well before feeding. Feed at least two hours after normal milk replacer feeding. Do not mix with milk or milk replacer for best results. It is recommended that you continue twice daily calf milk replacer feedings as normal to help restore fluid balance and maintain body condition.

For calves with mild to moderate scours, dehydration and/or stress, feed 2 quarts (1.89 liters) of mixed Sav-A-Caf® Professional Electrolytes Plus™ 1–3 times daily, spacing feedings evenly between normal milk replacer feedings. Continue for 2–3 days or until scours have stopped and hydration is normal.

CAUTION! Severely dehydrated calves may require intravenous fluid therapy. Do not attempt to feed oral electrolytes to a calf that cannot sit up unassisted. CALL YOUR VETERINARIAN IMMEDIATELY.

IMPORTANT!

Individual animals vary in requirements. Adjust amounts using your own good judgment. When in question about animal nutrition requirements, please consult your veterinarian.

STORAGE

Store dry Sav-A-Caf® Professional Electrolytes Plus™ powder in a tightly closed container in a cool, dry place. Make fresh solutions daily. Discard any remaining mixed solution after feeding – do not store.

SHELF LIFE

When stored according to label recommendations, dry Sav-A-Caf® Professional Electrolytes Plus™ powder may be used up to one year past the date of manufacture. The manufacture date code can be found printed in black ink on the bottom tape of the bag.

This product was made in a feed manufacturing facility that does not handle or store products containing animal proteins prohibited in ruminant feed.

Available in:

- Bulk 50-lb. (22.68 kg) bags
- Drums with 70 6-oz. individual dose packets
