## CALF SUPPLEMENT SYSTEM

### SCOURS CONTROL CONCENTRATE

Medicated Calf Supplement - MR      Type B Medicated Feed

#### AS AN AID IN THE PREVENTION OR TREATMENT OF BACTERIAL ENTERITIS (SCOURS)

- Combines oxytetracycline and neomycin activity
- Includes supplemental vitamins
- Time-tested formulation

Sav-A-Caf® Professional Scours Control Concentrate is a medicated concentrate formulated to be mixed with non-medicated calf milk replacer to make a medicated complete feed for calves. When mixed and fed as directed, the product provides an economical source of oxytetracycline and neomycin activity to aid in the treatment or prevention of bacterial scours. Sav-A-Caf® Professional Scours Control Concentrate is fortified with electrolytes and essential vitamins as well as sodium bicarbonate to help correct metabolic acidosis in the scouring calf. Withdraw from feed 30 days prior to slaughter. Do not use in calves to be processed for veal.

#### DRY POWDER MIXING INSTRUCTIONS

Mix Sav-A-Caf® Professional Scours Control Concentrate with non-medicated milk replacer powder to make a Type C medicated milk replacer as follows:

#### PREVENTION OF BACTERIAL ENTERITIS (SCOURS)

Follow these instructions to prepare a Type C medicated milk replacer powder (complete feed) that contains 100 mg/lb. oxytetracycline hydrochloride and 200 mg/lb. neomycin base, which is equivalent to 200 g/ton oxytetracycline hydrochloride activity and 400 g/ton neomycin base.

Feed the Type C feed as a complete ration by reconstituting 1 pound of powder with 1 gallon of water to provide 100 milligrams of oxytetracycline plus 200 milligrams of neomycin base per gallon of milk replacer.

#### TREATMENT OF BACTERIAL ENTERITIS (SCOURS)

Follow these instructions to prepare a Type C medicated milk replacer powder (complete feed) that contains 200 mg/lb. oxytetracycline hydrochloride and 400 mg/lb. neomycin base, which is equivalent to 400 g/ton oxytetracycline hydrochloride activity plus 800 g/ton neomycin base.

Feed the Type C feed as a complete ration by reconstituting 1 pound of powder with 1 gallon of water to provide 200 milligrams of oxytetracycline plus 400 milligrams of neomycin base per gallon of milk replacer.

#### WARNING

Withdraw from feed 30 days prior to slaughter. A withdrawal period has not been established for this product in pre-ruminating calves. Do not use in calves to be processed for veal.

Available in:

- 40-lb. (18.14 kg) bags
- 20-lb. (9.07 kg) pails
- 3.37-lb. (1.53 kg) pails
